**BUSINESS and PUBLICITY.**—Notes. This is the important element of success in business. It is through the newspapers of the country that this can be thoroughly attained. Fortunes are accumulated in a few years by those who avail themselves of this power. The vast benefits resulting from systematic and continuous advertising, to a business, cannot be overestimated. The merchant, the manufacturer, or the mechanic, may increase his business at pleasure, in proportion to the energy and means he employs in gaining publicity. Then why do not all advertise? Because business men are only beginning to realize the importance of the subject. Still the amount of the annual expenditure of money for advertising is enormous. As the number of people is necessarily limited, so are the opportunities for advertising.

By an entirely original process, recently invented, the advertiser is able to imprint all upon paper, without the possibility of failure, a business card, containing corrections of errors, and the name of the advertiser, and the address of the merchant, the manufacturer, or the mechanic, may increase his business at pleasure, in proportion to the energy and means he employs in gaining publicity.
